Lancaster Farming

VOL. 12 NO. 26 | Lancaster Farming, Saturday, May 27, 1967 | $2 Per Year

DISPLAYING THE ORIGINAL CHARTER of the then Pennsylvania State Poultry Association, dated March 21, 1916, are John E. McGrann, left, and William R. Myer. Looking on at right is Lancaster County Poultry Association president John H. Hess. McGrann came into possession of the charter through his father, Frank McGrann, who had been the first president of the state association. In accepting the document for the Pennsylvania Poultry Federation, current president Myer noted: "This is a mighty nice way to celebrate my birthday!" L F Photo

Countian Presents Original Charter To State Poultry Federation President

An historic document which has resided in Lancaster for the past half century was turned over to the president of the Pennsylvania Poultry Federation Monday It will be kept on display at the Federation's Harrisburg office from this time on

Following a luncheon meeting at the Holiday Inn Lancaster, John E McGrann, a partner in the Farmers Supply Co at 215 E. Fulton Street, Lancaster, presented the original charter of the Pennsylvania State Poultry Association to William R Myer of Myerstown R1 The charter, dated March 21, 1916 and signed by Martin G Brumbaugh, Governor, had been in McGrann's possession since his father's death approximately four years ago Also presented were copies of the original constitution and by-laws of the association.

As the first president of the state association Frank Mc Grann had been the logical recipient of the document. When it was turned over to Myer it

Dairy Princess Contest Deadline Reset For 29th

The deadline for aspiring dairy princesses has been extended to Monday, May 29th, according to committee chairman Mrs Herbert Royer

It is hoped, Mrs Royer explained, that this extra couple of days will give several girls, who are considering entering the contest, time to reach a decision She also noted that any dairy farmers' daughters between the ages of 17 and 25

Red Rose DHIA Board Votes New Testing Rates, Effective June 1st

Beginning June 1st, members of the Red Rose Dairy Herd Improvement Association will be paying slightly different rates for their monthly herd milk testing service Some will be higher, some lower, depending upon herd size

Directors of the association Monday night considered three proposed rate schedules suggested by a committee appointed at the March meeting to study the question The proposal finally accepted was reported as being identical to the rate schedule presently in effect in the Chester County DHIA

Members with herds of less than 70 cows will be paying a slightly higher fee while those with more than 70 cows on test will gain a slight reduction in herd rates

An important feature of the new rate schedule is

Farm & Home Scholarships Awarded

J. Richard Thomas

Barbara Protasiewicz

Six, college bound Lancaster County youths were selected this week to receive Farm and Home Foundation scholarships

According to B Snavely Garber, Willow Street R2, Lancaster County Farm and Home Foundation president, each of the awards will be in the amount of $300

The money for these scholarships represents earnings from an irrevocable trust agreement set up by the late Elmer L Esbenshade to encourage local youths to obtain higher education in agriculture and home economics

The winners, all graduating high school seniors, will receive their scholarship awards in installments as they enter college in September

(Continued on Page 9)

County Swinemen Active In New State Pork Producers Council

Several Lancaster County swine producers are actively participating in the newly formed Pennsylvania Pork Producers Council, an industrywide self-help organization representing 893 members of six county and regional swine producer associations It acts as the state affiliate of the National Pork Producers Council

Recently elected vice chairman of the Pennsylvania Council was James Z Martin, Christiana R1. Martin has also served as secretary-treasurer of the Lancaster County Swine Producers Association for the last several years

Other county producers acting as delegates to the state council are John Henkel, Strasburg R1, Earl Fisher, East Earl R1, and C Warren Leininger, Denver R2

Chairman of the state council is Eugene Wingert of Franklin County, Herbert Schick, Kutztown is secretary-treasurer

PURPOSE OF COUNCIL

Swine industry leaders have expressed concern over the failure of pork to hold its own in per capita consumption in recent years, and they feel something can be done about it with an industrywide effort

The Pennsylvania Pork Producers Council will attempt to coordinate and promote swine

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

WEEKLY SUMMARY
LIVE HENS

Prices on light hens were unchanged to ½c lower. Demand fair. Offerings increased and were ample due in part to recent price break on shell eggs. However, some yearlings sold at 7c a pound, picked up at farms, for use in additional egg production. Heavy hen offerings were for the light buying activity. Prices paid at farm: Light Hens 5-6¼c, mostly 5-6c; Heavy Hens 11-13c.

Fogelsville

May 23, 1967

(Prices paid dock weights, cents per lb, except where noted)

Hens, light, 5-10½, mostly 5½-6½; Hens, heavy, 10-20, Pullets, 26-33, mostly 28-30, Roasters, 24½-33, mostly 28-30; Ducks, 14½-20, Drakes, 16-21; Turkeys, hens, 20-33, mostly 28-30½; Rabbits, 45-85, mostly 46- 51; Guineas, 72½-90, mostly 85; Pigeons (per pair), 50-140, mostly 70-75; Jumbo squab, 90.

Total coops sold: 315.

Eastern Shore Exchange

WEEKLY SUMMARY

Lot—average broiler and fryer live prices gained nearly ½-cent this week to average 14.08 cents per lb.

Prices paid during the week ranged from a high of 14.7 cents a lb. on Monday to a low of 13.1 cents on Wednesday and Thursday.

Total sales for the week declined 300,000 head to a level of 780,100 head

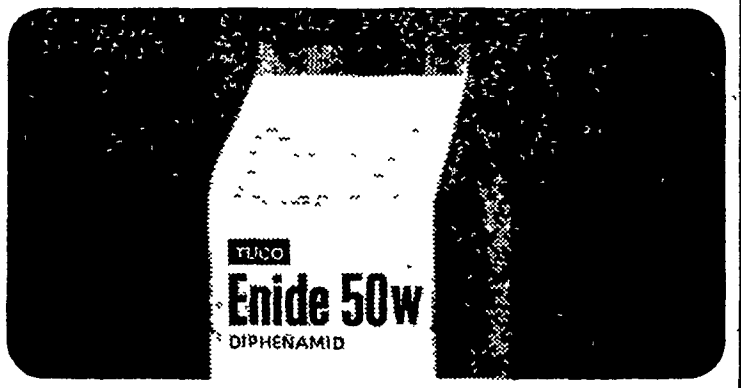
Get better weed control in your tobacco



use Enide® 50w

it stays mixed, won't clog

Enide is made different to work better. It's a 50% wettable powder that mixes easily, foams less and won't clog sprayers. It kills broadleaf weeds and grasses as they germinate. And one application gives up to a full season's control. You get cleaner fields with less cultivation. Harvesting is easier. Yields are higher.

From Where We Stand . . .

He Needs Help Least Who Helps Himself

Except by controlling grain price and supply, the federal government has never managed to really get its hooks into livestock farming. Perhaps one reason they never will is demonstrated by the swine industry's effort to run its own show, as reported on Page 1 of this issue.

A National Pork Council was formed recently and state and regional affiliates were established. Many leaders of the swine industry felt that this self-help approach might be the best answer to solving some of pork's perplexing problems.

As conceived, the entire project will be supported through a voluntary producer checkoff program. Funds gathered in this way will be used largely to garner a somewhat larger chunk of the consumers' food dollar, and for research programs aimed toward improved efficiency of production.

As an industry, the hog business has been having a tough time in competition for its fair share of the great American stomach. While per capita pork consumption has been drifting along at about 60 pounds, beef consumption has doubled to over 100 pounds, and poultry has tripled. The National Pork Producers Council hopes to restore the industry to a steadier status of substantial growth.

We are proud to note that this spirit of self-help extends all the way down to our own Lancaster County pork producers Several of these men are now active in the Pennsylvania Pork Producers Council, with one serving as its vice chairman.

We predict that in the years ahead any agricultural industry that wants to run its own business, instead of living off of Uncle Sam's many-stringed dole, will follow this self-help course of action. Some other farm industries are already pointing in this direction.

However, the only way an industry can truly handle a job of such financial proportions is through the cooperation of every participating producer. A contribution of five cents a hog marketed would cost producers about one-tenth of one percent on a $50 hog Feeder pig producers are being asked to kick-in two cents a pig sold.

The way we see it, if pork continues to run a losing race in the marketplace because of under-consumption, those who refuse to contribute their nickels and pennies to promote their product will be the real losers.

While some segments of the food production chain are busy crying "Help" into the wilderness of Washington, the pork industry seems to have found its own **HELP**, and the only brand that's really any good in the long run — the kind that comes from **within!**

As The Wind Blows

Secretary of Agriculture Orville Freeman seems to be out to set some kind of an Olympic record for fence jumping these days.

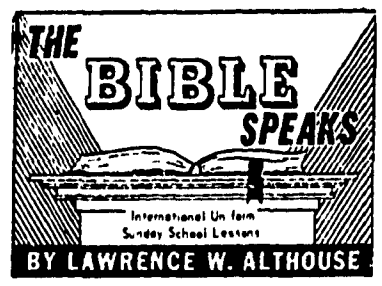
Depending upon which way the political wind blows at any given time, Freeman's boss has him talking farm prices either up or down. The policy the Administration is trying to make workable is one of supply-demand food balance.

Although Freeman has repeatedly denied the Administration is following a "cheap food policy", the fact remains that, in comparison with the rest of the economy, prices to farmers are of a Depression nature. In his recent flying jumps around the country holding so-called "shirt-sleeve" sessions, Freeman himself points out that: "No American should be complacent when the dairy farmer in this country receives an average wage for his labor that is less than the minimum wage set by Congress."

And to give him his due, he has taken action lately to close the loopholes to some evasions of the dairy import quotas. "But, Mr. Secretary, what took you so long to recognize these evasions of the law which you yourself have described as 'transparent'?"

Dairymen and their organizations have been complaining for some time about the way in which dairy import quotas were being ignored, but apparently only now does the Administration find it expedient to take action.

Should food prices to the farmer make a sudden recovery, you can bet the Administration will hop back over that fence and try to jawbone prices back to levels more palatable to consumers. This will be increasingly true the nearer we get to the elections next year. President Johnson will have enough problems to try to explain away, if he decides to run for reelection, without having consumers blaming him for food prices which they think are too high.



To Transform Defeat

Lesson for May 28, 1967

Background Scripture: Acts 8:2-40
Devotional Reading: John 4:19-26.

Following a particularly expensive victory during the Franco-Prussian War, a German general is reported to have remarked: "If we have any more victories like this, we're finished!"

Rev. Althouse

Students of military history are aware of the truth behind this apparently contradictory statement The price we pay to win a battle may sometimes cost us the war because it is too high. The seeds of defeat may be planted in the midst of our victories Both victory and defeat may be mere illusions in the short run.

Beyond "Final" Defeat

This was certainly true in the struggle between the followers of Jesus and his enemies. To insure his defeat, they had Jesus put to death. In time, however, they found that death had not stopped his movement; if any thing, it seemed to spur it on Once more they tried the strategy of force on his chief apostles, Peter and John. Assuming the threat of violence was enough, they warned them and, when that had no effect, they put them into jail. Yet each of these "victories" turned out to be subtle defeats.

Then Stephen came on the scene and once again they attempted to win with violence. The death of Stephen touched off a violent persecution against the followers of Christ. Surely now the defeat of the Nazarene would be final. Stephen dead, the little fellowship attacked, disciples dragged off to jail, others scattered in their attempt to avoid capture — surely this would seal the defeat of this strange group and silence them once and for all!

Their reasoning seemed sound enough. Many, many people have turned to violence and death to destroy their opposition, regarding it as "the final solution."

Often, however, it has been a hollow victory that later proves to have been a defeat. God has an awesome ability to raise up victories from the ashes of defeat. From the day of Christ's crucifixion, there came the morn of resurrection and the day of Pentecost. From the day of Stephen's martyrdom and the ensuing wave of persecution, there would come the beginning of the Church's mission to the whole world.

Lemons Into Lemonade

The strategy had been to kill Stephen and scatter the little band of Jerusalem Christians, but Luke tells us how God turned the tables: "Now those who were scattered went about preaching the word." (Acts 8:4 RSV) God was able to turn the evil intentions of his enemies to his own advantage. As Harry Emerson Fosdick once put it: he turned his "lemons into lemonade." Defeat was transformed.

The irony of it all is that without the persecution, the Church might have remained content in Jerusalem and never gotten started in its mission to the world. It was persecution itself, intended to kill the gospel, that actually got the apostles out of Jerusalem and into the areas where God wanted the gospel carried The violent opposition of men may affect the course of God's will, but not its ultimate objective

Learn To Capitalize

The little Christian community in Jerusalem learned that victory is not always victory, nor is defeat always defeat. Because God can turn our failures into his successes, we must learn to let him capitalize our disabilities, to bring good out of evil.

H.G. Wells had to give up a dull, poorly-paying job because of his poor health. Thus, he stayed home, wrote successful books, and became a world-famous author. Edison used his deafness to help himself to better concentrate upon his inventions. So it is when we turn over our liabilities and our defeats to Jesus Christ.

The followers of Christ are sustaining many defeats in the world today. As always, however, if we will seek both God's will and power, these defeats can be transformed into victories for the kingdom.

(Continued from Page 1)

was still in the original paper-covered cloth envelope in which it was mailed to Frank McGrann in 1916

The elder McGrann was proprietor of Whatglen Farm, which was located between the Groffdale Road and what is now the Lancaster Country Club on New Holland Pike The present Route 230 By-pass went right through the McGrann farm Frank McGrann was widely known as a breeder of Single Combed Black Minorca chickens, and exhibited these fancy birds at shows all over the Eastern Hemisphere

Also on hand for the occasion Monday were John H Hess and Don Timmons, president and publicity chairman, respectively of the Lancaster County Poultry Association Hess had contacted state president Myer, and helped arrange details of the charter transfer from McGrann to the Pennsylvania Poultry Federation

● Dairy Princess

(Continued from Page 1)

who had not previously considered entering the contest may wish to do so now

PAGEANT

Tickets for the annual Lancaster County Dairy Princess Pageant will go on sale June 1st Mrs Royer said The dinner and pageant will be held at the Host Town Motel, Lancaster, on June 13 at 7 p m, with tickets selling for $3 50 All members of the county's dairy industry are urged to support this effort and, in doing so, help promote their own products, Mrs Royer added

Tickets will be available from any member of the dairy princess pageant commtitee, Atlantic Breeders Cooperative, or from the county extension office

In addition to Mrs Royer, the pageant committee includes Mr and Mrs John J Herr, Mount Joy, Mr and Mrs. Samuel Myers, Elizabethtown; Robert Keen, Queen Dairy, William Deisley, Moore Dairy, Robert Gregory, Miller & Bushong, C P Brantley, ABC Mr and Mrs Jay M Risser, Red Rose DHIA and Miss Martie Foulk, Akron Miss Foulk was the 1964 Lancaster County Dairy Princess

Master of Ceremonies for the pageant will again be Harry Kauffman of the Philadelphia Dairy Council.

---

100 years ago, American farms produced ⅓ of the gross national product, in dollar volume Now, it is about 1/20th

Weather

Look for temperatures during the next five days to average in the normal range of 78 to 55 degrees. A mild weekend is expected to be followed by cooler temperatures early in the week, then mild again about midweek.

The precipitation outlook is good for field work with the only rainfall in sight expected to total ¼-inch. This will occur as showers Saturday night or Sunday.

Farm Calendar

May 29 — 3-5 p m, 4-H Capon Club members get birds at Melvin Peifer farm Manheim R1

June 1 — 8 p m, Lancaster County Poultry Assn directors meet at Farm Credit Bldg, Lancaster

June 3 — 8 p m, District Pomona Grange meeting at Kimberton Grange Hall

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Feed Hay On Pasture

Dairymen who are using pasture for the milking herd will find it a good practice to continue feeding hay or silage in spite of lush growth of forage crops The extra dry matter will help slow down the movement of the fresh grass through the animal's body, and make it possible for the digestive juices to extract more feed nutrients Many animals will nourish some dry matter in addition to the fresh forage

To Keep Spray Records

The importance of all producers of food or feed crops to keep accurate spray records cannot be over-emphasized The date, amount, and material applied to any crop or to any livestock should be recorded Record sheets are available from our Extension Office for this purpose and there is little excuse not to use them Accurate records might save the loss of a market and farm income

To Wilt Grass Silage

If any of the first cutting of the hay crop is to be made into silage, it is very important to do some wilting to get rid of excess moisture The use of a hay conditioner in the field immediately after mowing will hasten the loss of plant juices Forage that is ensiled when below 50% moisture may cause some problems in conventional silos such as poor packing, sorting of the pieces, and even spontaneous combustion Silage of medium moisture content (60 to 65%) could be most practical on many farms

● Have You Heard

(Continued from Page 11)

If your recipe calls for 8 ounces of macaroni, you simply use half of a one-pound package.

In some market areas, you'll find 7 and 14-ounce package weights available

In most recipes, you can use any variety of macaroni, spaghetti, or noodles

Follow the directions on the package for cooking a macaroni product

Safety Tips When Using Insecticides

Read directions every time you use an insecticide. And be sure to follow instructions and safety precautions printed on every container

If you're using an insecticide in an aerosol container, look for the arrow on the spray button and make sure it points away from you before you press the button

Store garden chemicals by themselves and out of reach of young children Keep children and pets away from the area while you're spraying.

Some Things To Do When Child Is Ill

Whenever possible, move an ill child into the den, recreation room, or living room during the day. This provides a welcome change of scenery and often makes it easier to care for him, especially if his bedroom is on the second floor It also gives him the feeling of not being alone and removed from his usual routines, which often are the major complaints of an ill child

Books, magazines, portable radio or television, and records will entertain the child while you do your housework Give him the comic section of the newspaper as soon as the paper arrives. But a word of caution — avoid overloading a sick child's bed with toys

Check Horse's Feet — Your horse's feet may need either trimming or shoeing If toe or heel is too long, the proper slope of the pattern changes. This places undue strain on the tendons that control his foot and hoof, says James P. Gallagher, extension livestock specialist at Pennsylvania State University.

FULTON GRANGE NO. 66 REPORTS ON MEETING

Fulton Grange No. 66 held its regular bi-monthly meeting on May 22 at Oakryn. Clifford W. Holloway Jr. presided at the business session. The Charter was draped in memory of Mrs. Leslie I. Bolton who had been a member for fifty-four years.

Officers of Lancaster County Pomona Grange No. 71 will fill the chairs at a district Pomona Grange meeting to be held Saturday, June 3, at 8 p. m. at the Kimberton Grange Hall, near Phoenixville, in Chester County. Grangers from Lancaster, Chester - Delaware, Montgomery and Lower Bucks Pomona will attend.

The Home Economics Committee has an entry for the National Grange sewing contest which will be judged on the county level this week.

The Youth Committee reported that the scrap drive for the benefit of Boy Scout Troop No. 330 netted $114.80.

The annual memorial service was in charge of the Lecturer, Miss Agnes Spence. Rabbi Sampson A. Shain, Temple Shaaria Smomayim, Lancaster, gave the address "The Meaning of the Lives of Your Dear Ones Who Have Passed Away." Mrs. Melvin Shaub gave a reading "How Will It Be." Deceased members honored were John Trimble, E. Maurice Gregg, Harry Cobaugh, Mrs Maude Christie, Mrs. Laura B Stubbs and Mrs Leslie I Bolton. Others taking part in the service were Master, Clifford Holloway, Chaplain, John Galbreath, Lecturer, Miss Spence, Gyles Brown, Clayton J. Metzler, C. G. McSparran, Mrs. Susan Fite, Mrs. Harold Alexander and Mrs. Ralph Armstrong, Pianist, Mrs Adaline Edwards gave musical numbers.

Fulton Grange is holding its annual "Go-to-Church" night Sunday, June 11, at 8 p m. at the Grange Hall with Rev. Kenneth Hill, Steelton, the speaker and the Grange double quartette will furnish special music. The service will be preceded by a covered dish supper at 7 p. m. Tablecloth, rolls, butter and drink will be provided. Everyone should brinf a meat dish and another dish, their own silver, cups, plates and napkins The public is invited to attend both the supper and the worship service

Pooling May Be Allowed On Del. Valley Order

The U.S. Department of Agriculture announced this week that consideration is being given to suspending some provisions of the Delaware Valley federal milk marketing order.

The proposed suspension would apply to the amended order which becomes effective June 1, 1967. If action is taken, it would allow pooling of milk produced under the Delaware Valley order diverted to a plant regulated under another federal milk order. Also, on milk diverted from a pool plant to a more distant plant, the suspension action would provide for pricing such milk f. o. b. the plant from which it is diverted.

The suspension was requested by the Inter-State Milk Producers Cooperative pending consideration of its proposals to modify these provisions at a public hearing. Inter-State represents a substantial number of dairy farmers serving the market, USDA noted.

The Delaware Valley federal milk order covers producers in the Philadelphia and Wilmington marketing areas, and most of southern New Jersey The amended order recently converted the area from a handler pool to a marketwide pool basis.

Dryness Halts Corn Planting—Area farmers following plows and planters were generally surrounded by dust clouds this week (May 17) as the dry spell extended into its third week

Tomatoes, early peas, hay, and pastures are all retarded by the unseasonably dry weather

Sec. Benson Seeks New Farm Legislation—Speaking at a special news conference for the Newspaper Farm Editors Assn. in Washington, D. C. (May 12), agriculture secretary Ezra Taft Benson called for an agricultural act based on peacetime needs.

He indicated new farm legislation not based on needs of a general economic depression, or wartime, is needed

The move has been toward less controls and regulations, Benson said. "I believe that present agricultural policies are sound," he added

When questioned on specific changes he'd make, he said that for the present, he had none

County Agent Gets Superior Service Award — Lancaster County agricultural agent M M. Smith was presented a Superior Service Award Tuesday (May 21) at Washington D C.

The award is one of the highest honors the U. S Department of Agriculture can bestow

Smith's citation read· "For superlative work in promotion of beef cattle feeding, and for outstanding leadership in 4-H Club achievements"

NEPPCO Survey Eyes Federal Controls—A survey of poultrymen conducted by Northeastern Poultry Producers Council (NEPPCO) reveals it is the small poultryman who is most outspoken against federal crop planning or poultry production control.

Dr. Alfred Van Wagenen, NEPPCO managing director, reported that nearly 55 percent of those farmers with 20,000 hens, or more, indicated a preference for some type of federal help Only about 15 percent of the growers with 1,000 birds, or less, thought government assistance a good thing

Reflections

(From the files of Lancaster Farming)

One Year Ago

May, 1966

No State Pullet Program—Poultry and allied industry people went on record overwhelmingly opposing the proposed Pennsylvania Approved Pullet Grown Program Tuesday (May 10) at a hearing at the State Department of Agriculture building in Harrisburg.

Although state agriculture officials maintained the program had been requested by members of the poultry industry, they refused to reveal who those industrymen were.

Questions and statements from the floor interrupted the official reading of the proposed program

At the end of the meeting, assistant agriculture secretary Jack R. Grey asked all those opposed to the program to so indicate with their signatures He lamented the fact that those people who requested the program had not seen fit to attend the hearing

* * * *

Buy-Your-Own-Steer-Plan Debated — The question of whether the Red Rose 4-H Baby Beef Club should institute a plan allowing members to purchase their own club steers was the subject of a lively debate Wednesday night (May 4)

In the member-parent-packed auditorium of the Rohrerstown Elementary School six speakers talked for and against the proposal

Speaking in favor of changing the rules were Larry Weaver, New Holland R1, a former beef club president; Bill Hollinger, Quarryville; and Carol Hess, Strasburg R1.

Debating for the other side of the issue were club leader Melvin Rohrer, Lititz R3; Bill Houser, Lampeter; and Pat Yunginger, Marietta R1.

Whether to change or retain the present system in which all steers are screened and selected by a committee of club leaders will be voted on by the members at the next meeting

* * * *

NEPPCO Takes Freight Rate Action—At the recent semi-annual board meeting directors of the Northeastern Poultry Producers Council (NEPPCO) endorsed a plan to obtain a reduction of freight rates on feedstuffs shipped into the northeast

The action was necessary, NEPPCO said, due to the recent withdrawal of the New York Central Railroad's proposed rate schedule The new schedule was withdrawn because of ICC's approval of the Pennsylvania-Central merger.

The NEPPCO board voted to use any legal means available to pressure the merging rail companies to adopt the proposed rates once the merger becomes effective

F&H Scholarships Awarded—Two county youths were recipients of the first Farm and Home Foundation scholarships this week (May 21).

Winners were Eric Stoner, 1051 Eden Road, and Eileen V. Anspach, 1711 Ridgeview Avenue. Both awards, in the amount of $250, were presented by F&H president B. Snavely Garber They will be used by the recipients toward their higher education at Penn State University.

Five Years Ago

May, 1962

Grows His Grass Indoors—A dairy farmer near Marticville, Charles H. Hess, is growing hedge against short pastures — he's growing his grass indoors.

While Hess doesn't expect the grass to take the place of pasture, he feels it will help supplement the cows' diet.

The grass is grown from oats in seven days in an air conditioned incubator. It is fed to the cows once a day at the rate of 15 pounds per head

Hess has not yet decided to purchase the grass-growing machine, but preliminary calculations show the feed can be produced for between $8 and $10 per ton. The cost of the machine would be slightly higher than the cost of an upright silo, he explained.

As for the practicality, he will judge that after a three-month trial period.

Artesian Well Yields 180 Gallons Per Minute—When he decided to drill a well to supply his dairy herd recently, farmer John Thomas, Jr., Millersville R1, had no idea he'd strike a 180-gallon a minute gusher.

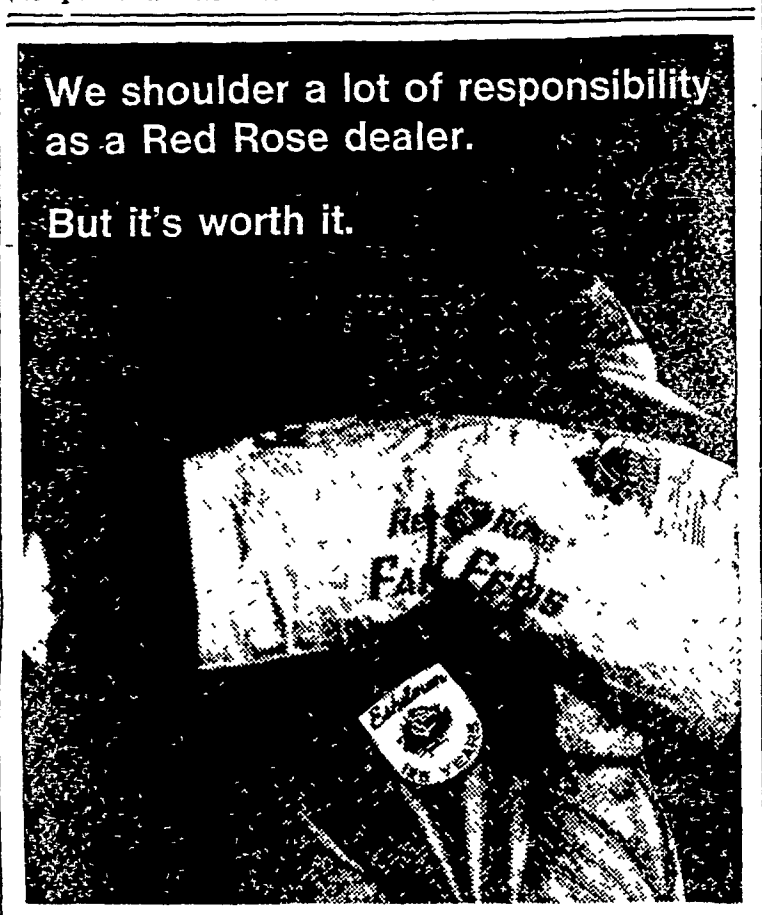
Well driller Paul C. Myers started drilling on the spot where a neighboring water dowser said water would be found at 110 feet

According to Thomas, the hole was so dry for 130 feet that water had to be poured into the hole to keep the drill working. The first 122 feet of drilling was through solid limestone.

While free-flowing wells are a rarity in Lancaster County, one flowing at the rate of 180 gallons a minute, night and day, is just about unheard of.

Word of Thomas' unusual "strike" spread fast, and in the following few days more

(Continued on Page 7)



When we put that Red Rose 125th Anniversary shield on our shirts, a lot of things change. You expect us to have the answers on animal nutrition and feeding programs. You expect us to carry a complete line of fresh, top quality feeds at reasonable prices

And we do.

Eshelman sees to it that we are always fully informed. Sees to it that we have a full line of the freshest and most nutritious feeds that science can produce.

We are proud to be part of this 125 year-young feed company Eshelman hand-picked us to wear their shoulder patch of service. You can depend on us to service you well.

● Scholarships

(Continued from Page 1)

It was noted that, according to the trust agreement, funds will be available each year to assist county youths in obtaining higher education in agriculture and home economics. This program is one of several educational phases of the Farm and Home Foundation.

This year's winners were:

Ann L. Bomberger, Lititz R2. She is the daughter of Mr. and Mrs. H. Richard Bomberger and will graduate from Warwick High School. Miss Bomberger will enter the school of home economics at Mansfield State College.

John B. Clark, Lititz R1, the son of Mrs. Mary B. Clark. Following graduation from Warwick High School, he plans to enter the agribusiness curriculum at Penn State University's Wyomissing branch.

Josephine M. Nissley, Washington Boro R1. She is the daughter of Mrs Barbara A. Nissley, and will be graduating from Penn Manor High School. In September, Miss Nissley will enter the school of Home Economics at Drexel Institute of Technology.

Charles J. Patterson, Willow Street R2. The son of Mr. and Mrs. Charles R. Patterson, he will be graduating from Lampeter-Strasburg High School Charles has been accepted in the College of Agriculture at Penn State University for the fall term.

Barbara Protasiewicz, 860 Hilton Drive, Lancaster She is the daughter of Mr and Mrs William Protasiewicz, and will graduate from Lancaster Catholic High School She plans to enter the University of Indiana as a home economics major in September.

J. Richard Thomas is the son of Mr and Mrs John H. Thomas Jr. of Millersville R1 Following graduation from Penn Manor High School, Richard will enroll in the College of Agriculture at Penn State University.

These winners were selected by the Farm & Home Foundation scholarship committee consisting of: Mrs Landis Myer New Holland R1; Mrs E Robert Nolt, 3650 Meadow Spring Rd, Lancaster, Mrs. Doris Thomas, 202 P O Bldg, Lancaster, Dr Harry K Gerlach, Lancaster, John H Herr, Millport Rd, Lancaster, Phares S Risser, Elizabethtown, and M M Smith, Lancaster County agent

Rural Survey To Be Made In Pa.

HARRISBURG — On-the-spot counts of rural families, crops and livestock in 350 agricultural areas, selected at random, will be made in all Pennsylvania counties except Philadelphia and Pike, according to an announcement this week

The survey, under the direction of the Pennsylvania Crop Reporting Service, State Department of Agriculture, will begin May 29 and end June 10 It is part of a nationwide study being made by the U S Department of Agriculture

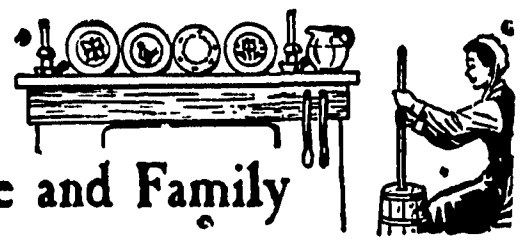
Thirty-seven supervisors and enumerators, selected from 27 counties, will gather facts during personal interviews in the selected areas, according to Dewey O Bosler, statistician in charge of the PCRS

The interviewers will locate scientifically selected land segments to be visited by using aerial photographs outlining the specific tracts and county road maps that help pinpoint the farms All farmers operating within the segments are to be asked about their agricultural activities

Information obtained by these enumerators will supplement facts obtained in regular agricultural surveys made by periodic mailed surveys Statistics obtained in these surveys are used to prepare crop and livestock reports that are required in modern agriculture

A series of training sessions for supervisors and enumerators were conducted in Harrisburg and Greensburg by Mark A Evans and Harry J DeLong agricultural statisticians of the Pennsylvania Crop Reporting Service

The ideal wife is one who saves worms for hubby's fishing, as she spades the garden.



For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

FRESH FRUIT FANFARE

Hostesses with a reputation for distinguished desserts often pick fresh fruit combinations as favorites. Unless fruit is dressed up with a rich dressing it is low in calories — the perfect ending to a heavy meal. Fresh fruit is refreshing — what more could you want on a hot summer day. The combinations of fruits with other fruits or foods is endless — so you can have lots of variety.

We would not go so far as to say that this Orange Bavarian Cream is a low calorie dessert but we would like to say that it is about one of the yummiest you have ever eaten.

Orange Bavarian Cream

1 tablespoon unflavored gelatin
¼ cup cold water
¾ cup unstrained orange juice
2 tablespoons lemon juice
½ teaspoon grated orange rind
½ cup sugar
¼ teaspoon salt
1 cup whipping cream
1 cup fresh orange secaions, cut in bite-size pieces

Soften gelatin in water. Combine fruit juices, orange rind, sugar and salt; heat to simmering. Dissolve gelatin in hot mixture. Chill, stirring occasionally, until mixture is the consistency of unbeaten egg whites.

Whip cream only until stiff. Fold whipped cream and orange sections into gelatin mixture. Pour into a 1-quart mold and chill until firm Makes 6 servings.

Fruit Compote With Fluffy Topping

1½ cups diced fresh pineapple
1½ cups sliced fresh strawberries
½ cup halved and seeded grapes
3 tablespoons sugar
1 recipe Fluffy Topping

Combine pineapple, strawberries and grapes, sprinkle with sugar anud chill Just before serving add banana Serve in chilled fruit dishes and top with Fluffy Topping . Makes 6-8 servings.

Fluffy Topping

½ cup sugar
3 tablespoons flour
½ cup pineapple juice
3 tablespoons lemon juice
1 egg, slightly beaten
1 cup whipping cream

In a saucepan combine sugar and flour; gradually add pineapple juice and lemon juice Cook over medium heat, stirring constantly, until mixture thickens and loses starchy taste. Add small amount of hot mixture to egg, return all to pan Cook 1 more minute Chill Whip cream, add chilled mixture and beat only until

Two important things when borrowing money

You need a sharp pencil plus the specialized financial advice of Farm Credit to determine how your financial needs can best be served. Farm production must be maintained, even increased if possible. Providing the financing to insure this is Farm Credit's job. Farm Credit loans are available now for any sound farm need. And, at realistic rates. Farm Credit interest is based on the unpaid balance of the loan. That saves you money.

IF YOU'RE A FARMER IN LANCASTER COUNTY— THIS IS A DOGGONE GOOD FELLOW TO KNOW

George M. Lewis, Agricultural Relations Officer at the Conestoga National Bank, likes to hunt . . . he's very much at home in the field. A 1953 graduate of Cornell University where he majored in Agricultural and Economics, George speaks "your language". By training and experience he is equipped to assist you with all types of mortgage loans, seed and feed loans, farm equipment loans . . . in fact, anything that has to do with agricultural loans and financing.

If you haven't already met George, stop in soon at the Conestoga—everybody's Headquarters for Money Matters in the Lancaster Area. Better yet . . . give George a call and have him come out to discuss your problem. After all, he's more at home on a farm than in the office. As a suggestion, start your conversation by asking about his dogs.

well blended. Use as topping for fresh fruit. Yield: 2 cups

NOTE: Other fresh or canned fruits may be substituted for the above fruits.

Fluffy Topping stores well in the refrigerator.

* * * *

Here's a main dish salad that is protein rich and low in calories

Fruited Shrimp Salad

2 cups shrimp, cooked, peeled, and cleaned
1½ cups pineapple chunks, drained
1 cup orange sections, drained
½ cup celery, thinly sliced
¼ cup milk French dressing regular or low-calorie
1 bunch endive

Combine shrimp, pineapple chunks, orange sections, and celery. Add French dressing and mix lightly Chill. Serve on endive. Serve with brown bread, a beverage, and baked custard.

* * * *

Lobster and Orange Cocktail

½ pound cooked lobster meat
¼ teaspoon salt
2 large oranges
Lettuce
Fish Cocktail Sause*
Nutmeg

Cut lobster into ½-inch pieces; sprinkle with salt. Peel oranges and slice into cartwheels and quarter. Combine orange quartered slices and lobster meat; chill Arrange lettuce in cocktail glasses. Add lobster-orange mixture; top with Fish Cocktail Sauce. Garnish with nutmeg

Fish Cocktail Sauce'

¾ cup catsup
¼ cup chili sauce
3 tablespoons lemon juice
1 tablespoon horseradish
1 tablespoon grated onion and juice
1 teaspoon Worcestershire sauce
¼ teaspoon hot sauce
¼ teaspoon seasoned salt

Mix the above ingredients thoroughly. Chill before serving. Makes 1-⅓ cups

Cooking Frozen Roasts

Hard-frozen oven roasts require about one-third to one-half as much cooking time for each pound as do corresponding fresh or thawed roasts

Use the same procedures for roasting hard-frozen meat as for fresh roasts

Place meat on a rack.
Roast in 325 degree oven.
Don't cover the pan.
Don't add water.
Don't baste during cooking.

Use a meat thermometer to determine the doneness of the meat Insert it in the roast after the center of the meat is thawed, or when it is about half done Don't force thermometer into partially thawed meat; it may break if the roast is still hard-frozen in center.

Worth Knowing About Macaroni Products

Macaroni products are measured by weight instead of volume because of differences in size and shape. Use the package weight as your guide in preparing a macaroni product dish

● Pork Council

(Continued from Page 1)

and pork programs within the state, represent pork producers at state and national levels, and promote the sale and use of pork

FINANCING

To accomplish this objective, a self-help program has been designed in which the individual pork producers can systematically contribute through a voluntary checkoff at market time

A deduction of five cents would be made on all market hogs at the first point of sale On feeder pigs, the deduction would be two cents

It is the hope of the state council to have this plan into effect by January 1968 But until that time the Pennsylvania Pork Producers Council solicits the support of all swine producers in the state to rally behind the program with their contributions based on the official proposal of five cents on market hogs and two cents on feeders

Forty percent of the total amount of the checkoff money will be used to carry on the state program, the remaining 60 percent will be forwarded to the National Council for nationwide pork promotion efforts

QUEEN CONTEST DEADLINE

The contest entry deadline for Lancaster County Pork Queen has been reset for June 10th, according to queen committee chairman C Warren Leininger It was decided to reschedule the original June 1st deadline because of the newness of the contest — this is its first year, and because of the short time between announcing the contest details and the deadline.

"We also hoped this extension would give more daughters of pork producers a chance to learn about the contest and participate," Leininger noted.

The contest is open to any single girl between the ages of 17 and 21 who is the daughter of a member of the Lancaster County Swine Producers Association. She will be required to present a short talk on some subject pertaining to the pork industry.

Judging will be on the basis of beauty and personality (30 points), essay content (30 points), and presentation and poise (40 points).

Any girls who would be interested in representing the county's pork industry are invited to contact Leininger at Denver R2.

First 4-H Capons Due Here May 29th

Capon Club 4-H'ers were reminded by associate county agent Winthrop Merriam this week that their capons are comin' The first shipment is due for delivery on Monday, May 29th, and the second lot will be delivered either June 5 or 6

Members receiving birds in the first lot are advised to pick them up between 3 and 5 p m on Monday at the Mervin Perfer farm at Manheim R1 Anyone not able to get his capons at that time is asked to notify the extension office

All orders are to be paid for at the time they are picked up, Merriam said noting that payment should be made by checks payable to the Wilmarth Poultry Farm "No cash, please," Merriam advises

The home of Mr. and Mrs Ronald Weidman, Newmanstown

We asked the Ronald Weidmans, who converted to total electric living:

Is it as low-cost as we promised?

Their answer:

Yes! We paid just $32.49 a month last year for everything, *including* electric heating!

This low cost also included electric water heating, cooking, laundering, lighting, and all their other electric services.

That's why we say, to make a true comparison of the total costs of home heat and operating all your work-saving appliances, you must add together *all* costs.

With total electric living, for instance, there's just one service, one bill and no expensive maintenance contracts. But to get the true cost of flame-type heat, you must add together the fuel bill, the electric bill and the service contract. Put them all together and you'll see why we say live the total electric way as the Weidmans do.

IF YOU ARE BUILDING — be sure to tell your builder you want to be modern, you want the best, you want electric heat.

IF YOU ARE REMODELING — call a Reddy Kilowatt Recommended Electric Home Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."

...with Ful-O-Pep Gro-Pork 45 and grain

LESS THAN 3 LBS. of total feed to produce a pound of pork. That's **real efficiency...** using Ful-O-Pep Gro-Pork 45 Supplement and local **grain.** Eight lots of hogs averaged a 2.83 conversion at the Ful-O-Pep Research Farm.

2.78 WHEN REPEATED —The next 8 lots of hogs fed out on Ful-O-Pep Gro-Pork 45 Supplement and grain proved the efficiency of this feed **once more.** Average conversion? 2.78 lbs. of feed per pound of gain.

It's worth trying Ful-O-Pep... for the extra efficiency you get. Put your **next hogs on Gro-Pork 45.**

Ful-O-Pep is the feed of efficient feeders

● New Rates

(Continued from Page 1)

that the amount retained by the association to cover its increasing operating costs will increase as herd size increases. Previously, the association's share was $1 per herd tested, regardless of size. Now that amount will vary from 50 cents for ten cows to $5 for 100-cow-herds, figured at a straight five cents per cow.

The charge for the Penn State-IBM record keeping will remain unchanged at ten cents per cow.

The testers' fees will be $1 higher on herds up to 70 cows in size, and basically somewhat lower on herds above that size However, directors also voted that testers could charge herds larger than 70 cows an additional $4 50 if the job is completed in one day If the job requires two days of tester's service, he will have the option of charging $9 for the additional day

While it was noted that the state association regards the testing of 70 cows as a good day's work, most testers seem to prefer to finish up in one day, regardless of herd size

Until Monday night's meeting, held at the Penn Dairies Plant, Lancaster, members of the Red Rose association had one of the lowest rate schedules in the state, according to state association director J Robert Hess In southeastern Pennsylvania, Lancaster County dues were the area's lowest for an average 40-cow herd, with the exception of Lebanon County

ACCOUNTS RECEIVABLE

The association's accounts receivable situation was also reviewed by the directors. According to treasurer Jacob Houser, accounts receivable from unpaid fees total $1300. While these were largely in the current, 30-day period, the directors decided to enforce a firm policy designed to eliminate such "charge accounts."

Hess pointed out that the association's by laws specifically state that all testing services are to be offered on a cash basis only Testers had previously been advised by head supervisor Wilbur Houser that a second month's testing was not to be done for any member who has not paid for the previous month's service

The directors voted to set August 1st as the date when this policy will be enforced They authorized the treasurer to withhold payment from any tester for accounts that had not paid the association for the current testing period

It was also recommended that testers and members be advised of this new regulation in advance, hoping that the cooperation of all concerned could be secured before the effective deadline. It was felt that the job of collecting for all accounts was the responsibility of each tester in the association

The board approved a joint meeting between directors and testers, and set a tentative date for sometime in August for the get-together A committee consisting of directors Clyde Martin and Raymond Burkholder, and of two testers to be appointed later by Wilour Houser, will arrange details for the meeting

"Serving Egg Producers Since 1916"

Samuel A. Dum

Former County Farmer On PSU Extension Staff

Samuel A Dum, who operated a dairy farm near East Petersburg from 1952 until last year was appointed May 1st to the Cooperative Extension Service staff at Penn State University as associate professor of farm management

While farming he served as president and secretary of the Red Rose Dairy Herd Improvement Association president of the Lancaster County Agricultural Extension Association chairman of Agway Garden Spot Zone president and secretary of the Lancaster Milk for Health and president of the Interstate Lancaster Milk Marketing Committee

In announcing Dum's appointment extension director Thomas H Patton said he will be primarily responsible for the supervision of educational farm management programs in dairy production economics.

Dum received two degrees from Penn State; a bachelor of science in agricultural education in 1941 and a master of science in agricultural economics in 1947. He received his doctor of philosophy degree in agricultural economics from Purdue University in 1949

Following graduate study, he was employed by the University of Delaware, first as associate professor of farm management, and later as assistant director of the Agricultural Experiment Station

A U. S. Air Force veteran of World War II, Dum served from 1941 to 1945 as a pilot instructor and bomber pilot in Italy, attaining the rank of major.

He is married to the former Mary E. Baker, of Landisville. They are the parents of three sons: Robert, 20; Richard, 17, and David, 9.
